

Neil H. Daseler
Office of the Director

November 13, 2012

To Whom It May Concern:

I am writing to you in recommendation of Mr. Boyd Martin. The Las Vegas Day School began its relationship with Boyd Martin seventeen years ago when he was the Vice President and General Manager of Fremont Construction. His first project was coordinating our 10,000 square foot, \$850,000 two story multipurpose building in 1995. Since the successful on time completion of that project, Mr. Martin has handled a number of smaller projects for the school including a classroom addition and Student Center remodeling in 1996 at a cost of \$194,000, the construction of our four court tennis complex in 1997 at a cost of \$205,000 and our Kinderschool project in 2002. The Kinderschool building, housing 3, 4, and 5 year olds, consisted of twelve classrooms and support facilities totaling 20,000 square feet. The project finished on time and within budget at \$2,885,000.

Boyd Martin left Fremont to start his own company Boyd Martin Construction LLC (BMC) in April of 2003. We contracted with him for Phase II of our new school construction master plan. Phase II is an 18,000 square foot, \$2,400,000 office and classroom complex which was completed in June 2004. BMC completed Phase III of our school master plan in August of 2006 which included twelve classrooms, an art complex and new library. The 29,500 square foot \$5.6 million dollar project was finished again on time and within budget. In 2007 BMC coordinated the construction of our parking lot on Red Rock Street including complete lighting and landscaping of the 1.4 acre site. They also managed a demolition project and some small scale remodeling on campus. BMC completed Phase IV of our campus master plan in August of 2009. The middle school building was a 27,000 square foot project which also included demolition of our original buildings on Jones Blvd and the construction of an entire new playground and parking area. The \$7.5 million dollar project again came in on time and within budget. During the summer of 2012 BMC managed our parking lot expansion to an existing lot which was built in 2007. They did a fantastic job of tailoring the construction so that upon completion it looked as if all of the parking area was built at the same time.

We have been extremely pleased with all of our BMC projects. Boyd Martin is a fair, honest and knowledgeable construction manager. He has proven skills in budgeting, estimating, scheduling, and project supervision. Mr. Boyd Martin is a credit to the construction industry and I can recommend him without reservation. If you have any questions concerning Mr. Martin please feel free to contact me.

Sincerely,
Las Vegas Day School
