RE: Letter of Reference

Dear Mr. Martin:

As we approach our one-year anniversary of moving into our new building constructed by your team, we reflect on our experience from the purchasing of the land to the construction of the building. Nothing about the entire process was easy.

Once BMC was brought on board, our challenges and difficulties seemed to diminish and were very manageable. BMC had the ability and expertise to transform this difficult project into a positive experience. The unforeseen obstacles were quickly managed and overcome with the determination of you and your team. We are extremely happy with the product we received. Your understanding about construction and project management is very advanced. Your constant attention to our project from architecture through construction was incredible. We received daily emailed updates with pictures. We watched and tracked the progress of the building in its entirety. We could not have asked for a better team to construct our new headquarters. We greatly appreciate your hard work, dedication, determination, and attention to detail that you provided us.

Not only did we find a great general contractor, we found a friend willing to do whatever it takes to complete the job with our best interest in mind. And for that we are grateful.

Thank you,

A handwritten signature in black ink, appearing to read "Ken Jenson", is written over a faint, larger version of the same signature.
