February 8, 2008

Dear Boyd Martin Construction,

I would like to take this opportunity to give my most gracious thanks to everyone who was involved in the building of my office...Chiropractic for life. All of my peers were stunned that your company completed my project on time and, best of all, under budget. I was pleased with the easiness of the process and the final outcome.

The customer service far exceeded any of my expectations. They met my requests before I signed the contract. I could call my project manager Derrick at any time and he would know the exact status of my project. The supervisor Dave was outstanding at keeping me posted what was coming up next and he always made sure that things were done to my liking. When obstacles would occur, they would handle it themselves and consult me when a choice was necessary. They always led me in the right direction. And of course Boyd, he came and did the final touches himself. This allowed me to stay stress free and focus on the growth my current practice. While most business owners complained of how slow business was last summer, mine actually grew!

I highly recommend Boyd Martin Construction for their quality of work, outstanding customer service, and unquestionable integrity. They were instrumental in making my personal dream a reality. And I thank God for blessing me with such wonderful people!

Yours in health & wellness,
Dr. Shadia Koury
