April 9, 2010

Boyd,

It is with pleasure that I write this letter of recommendation. As you are aware, we now have hired your company for two projects. Neither project would be considered a basic build as they are used for Radio Studios and transmitter sites.

The first job was a gamble in hiring your company even though you came highly recommended by our architect whom we have used for several jobs. The second job was a no brainer as I didn't even take the job out to bid.

The professionalism of you and your team is outstanding. Anyone can build a building and collect the payment. Boyd Martin Construction stands behind their work and the work of their subs.

Feel free to have any potential prospects give me a ring and I will echo to them what I am stating in this letter.

Thanks again for making the expansion of our company stress free and something we are all very proud of.

Sincerely

Tony Bonnici

V.P General Manager
